

## 1) Advanced digital micro-imaging - DP72

With unmatched performance, benefit from a camera system designed to capture exactly the image you want! The DP72 rapidly delivers images with highly accurate b/w and colour along with a sharp, vivid, real-time display. The high-sensitivity and high-resolution performance is complemented with cell\* family software that ensures powerful support for a broad range of microscope imaging requirements. Designed for users who want top-quality results as quickly as possible, the DP72 provides the meticulous colour rendition necessary for highly accurate bright field images as well as the high level of sensitivity required for distinguishing slight but crucial intensity and colour differences in high-resolution fluorescent images...[Read More](#)
