

## Olympus IX81 Inverted Microscope

**Advanced, fully motorized system for superior performance.**

The IX81 is Olympus' most advanced motorized microscope, providing high standards of observation, measurement and functional operation. A V-shaped optical path, improved fluorescence illuminators and further expanded UIS optics provide excellent performance for research applications. A modular system of motorized accessories allows for complete customization to individual research needs. Multi-dimensional analyses can be performed automatically or even remotely via computer control. Additionally, the IX81 features numerous input and output ports allowing the use of several light sources and detectors. The IX81 is the optimum imaging platform for research and automation...[Read More](#)
